For all Diagnostic Training – Specialists in MRI/CT

CT Intermediate Course

19-21 January 2026 Online

12-14 October 2026 Online

Overview

This three-day course builds on the basic CT course, however, if you have good clinical CT experience then is a good place to start. A lead physicist will explain the equipment and everything you need to know about the physics and technical side of CT.

This intermediate course reinforces the application of theory to clinical practice, covering a wider range of clinical topics demonstrating a range of pathologies and how a quality image is achieved in practice.

Course Content *Topics include:*

- Principles of CT
- Helical and multislice CT
- Dose and radiation protection
- Measures of Image Quality
- Quality Assurance
- CT Angiography principles
- Automatic exposure control
- CT parameters
- CT abdominal imaging
- CT brain disease and trauma
- CT thoracic imaging
- Hybrid imaging principles
- Cardiac imaging concepts and practice
- CT Angiography

Online Price : £555 + VAT
