For all Diagnostic Training – Specialists in MRI/CT

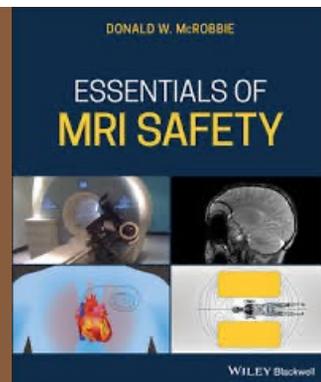

MRI Safety First!

10-11 May 2023

5-6 September 2023

Classroom and online options

Eden Learning's **MRI Safety First** course has grown to meet the needs of healthcare professionals working in MRI. For 2023, the course will be live in the classroom and delegates can log in remotely if they cannot attend in person.

This comprehensive course spans two days covering all aspects of MR safety: biological effects arising from the newest technology, dealing with passive and active implants, implications from recent gadolinium contrast agents research, the requirements of national and international standards, and conducting MR risk assessments.

Interactive sessions will explore roles and responsibilities in MR safety, MR suite design, and how to develop an MR safety framework. A parallel MR physics boot camp will address the scientific knowledge required to act as an MR Safety Expert.

Delivered by recognised experts in the field, the course is aimed at radiographers, radiologists, physicists and researchers with an interest in MR safety.

Date: 10-11 May 2023

Classroom/Online. London venue tbc

5-6 September 2023

Classroom /Online. London venue tbc
